IN SUPPORT OF THE BROOKS LANDING REVITALIZATION PROJECT

June 23, 2005

Commissioner Fashun Ku
Department of Economic Development
City Hall Room 005-A
30 Church Street
Rochester NY 14614

Dear Commissioner Ku,

Please note my complete support of the Brooks Landing Revitalization Project.

As a stakeholder in the fate of the community, I have long looked forward to the realization of the Project - the key element in the restoration of the vitality, economic health and overall desirability of one of Rochester's oldest neighborhoods. I believe the Project will provide a welcome to the West Side that all of Rochester will want to be a part of.

Among many changes, street improvements to resolve traffic flow issues that are underway have not had a major impact on my daily travels. In fact, I look forward to enjoying increased personal access to the riverfront park land that the reconfiguration of Plymouth Avenue will provide. In addition, I'm excited about the plans for increased retail, recreational and entertainment use of the area.

The origins and support for the project are community driven and very well documented. Every step in the process over the last twenty-plus years has been taken with the energy and input of my neighbors and representatives. It is my sincere hope that all this effort will finally bear fruit. The overwhelming support for the project exists as testament to the need for success of this project. I now wish to formally add my voice.

Sincerely,

Sandra J. DeBell

June 29, 2005

I am writing in support of the Brooks Landing Project. I live and own a business in the 19th ward neighborhood. The city of Rochester needs this project. It's efficacy as a progressive, pro community, pro business city is dependant on these kind of projects. What people see around them makes up the majority of how they learn to think about things. We need to change the thinking, both of the neighborhoods and of the entities that help us fulfill the potential that Rochester has.

I believe we will have safer streets in the area with the addition of new lanes and traffic light additions. I pass that corner almost daily and can attest to it's inefficiency for drivers and pedestrians.

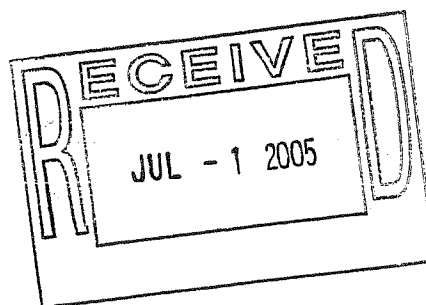

The better use of our natural resource, the river will bring us many opportunities in the long run. Access to this calming influence may make the difference in the stress of the surrounding neighborhood.

The pluses outweigh the minuses here. Economically it's the right thing to do. Culturally it's the right thing to do.

Please move this project along.

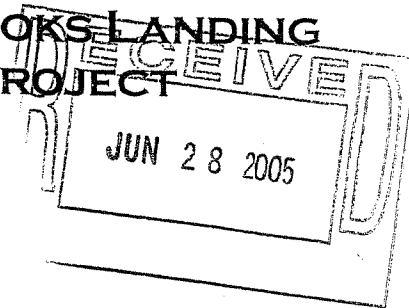

Sincerely,

Claire L. Crittenden

We have lived in the 19th ward for a total of 9 years by choice. The Brooks Landing project has been very exciting to us because it will greatly improve a very depressed area of the neighborhood, and we look forward to having a place to go, in the neighborhood, for a coffee, bagels, dessert, etc. I'm imagining an intersection of shops & restaurants, similar to the Park Ave. and Goodman St. intersection.

Commissioner Fashun Ku
Department of Economic Development
City Hall Room 005-A
30 Church Street
Rochester NY 14614

Dear Commissioner Ku,

I am writing regarding the Brooks Landing Revitalization Project. I have been involved with the 19th Ward Community Association, serving as its treasurer for the past 6 years. During that time, I have seen first-hand the tremendous effort that has been put into the dream of this project.

I have lived in the neighborhood for 14 years and have made a conscience effort to stay and raise my family in this diverse neighborhood. The decision to stay in the 19th Ward (we moved to our second home 5 years ago) was made with some trepidation regarding the community's ability to develop economically. There has not been much development in the community during my time here, and I truly believe that this project has the potential to really spur development that will spread from this corner to the rest of the 19th Ward. Its completion will help to spread the word about what a great place this section of the city is - a secret many long-time 19th Warders already know.

The Association, as I'm sure you know, voted overwhelming to support Sector 4's plans for a coffee shop on the northwest corner of Brooks and Genesee Streets by granting \$10,000 to the project. The Association realizes the significant impact that economic development in that corner of our neighborhood will have.

My family and I often ride our bikes from our home to Genesee Valley Park, passing by this section of the 19th Ward, and using the U of R pedestrian bridge (along with the other bridges in the park) to get back and forth. Developing this area so that pathways are more accessible to the river would be a great addition to this bike ride, and we are really looking forward to the day when the project is complete.

I hope that you and your staff realize the broad-based support that this development has and hope that you continue to press forward on our behalf with whatever final challenges lay ahead to gain approval for moving forward. Thank you for your continued effort on our behalf!

Sincerely,

Stephen B. Mullen

Louis A. Meyers III
1020 Genesee St
Rochester, N.Y. 14611

July 4, 2005

Fashun Ku, Commissioner

This letter is in response to the availability and public comment for the Environmental Assessment on the Brooks Landing project.

Proposed Action. It is great to know that the City of Rochester has an interest in revitalizing Sector 4 in the Brooks/Genesee area. I agree that this area has experienced severe economic and aesthetic decline as a result of vacant commercial and city property in the sub-areas I-III. The parkland and former railroad right-of-way proposed for the conversion for a private hotel is currently not in aesthetic and social decline. 6

Since the 1940's my Grandparents lived in the house at 1020-1022 Genesee St. The former Pennsylvania (Consolidated Rail) Railroad Right-of-way adjacent to our property has been maintained (with the planting of a garden area including Lilac and Apple trees) because of them. The railroad since abandoned their property, but my family and neighbors continued to maintain the areas adjacent to our property. Three generations my family have lived in this area, growing up with the benefits of having a park to enjoy with the river in view within the city. This proposal will directly affect the experiences of the next generation, my Niece, Nephew and their friends may have shared growing up in the large parkland environment, since they are now living at this home.

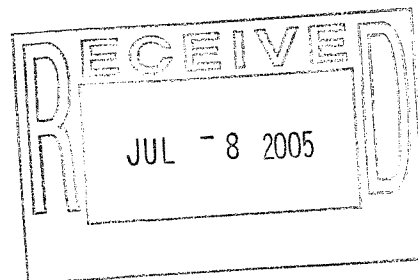

An addition to Turning Point Park does not replace the tremendous loss the private hotel will cause to the homes and their occupants adjacent to its structure. The proposed hotel will dramatically impact the views of adjacent residences. This impact needs to be addressed further. Existing vegetation, as well as parking lot landscaping is not sufficient to help screen the noise and view of the building and activities that will be associated with it. Additionally, the proposed placement of the hotel garbage dumpster should be relocated to an area not directly adjacent to the backyard of any residential home. 4,9
15,17

The problems of the vacant existing commercial property in the sub-areas I-III should be addressed first. This is the key to revitalizing the Brooks Landing area.

Thank you for your swift attention to this matter. I look forward to new developments on behalf of Brooks landing's current residents.

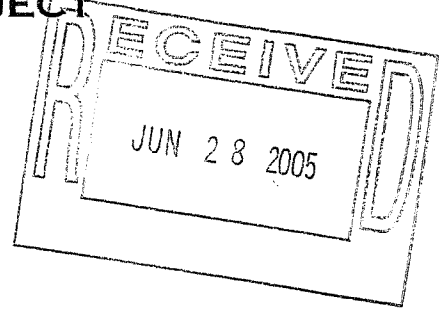

Sincerely,

Louis A. Meyers

As a stakeholder in the fate of the community, I have long looked forward to the realization of the Project - the key element in the restoration of the vitality, economic health and overall desirability of one of Rochester's oldest neighborhoods. I believe the Project will provide a welcome to the West Side that all of Rochester will want to be a part of.

Among many changes, street improvements to resolve traffic flow issues that are underway have not had a major impact on my daily travels. In fact, I look forward to enjoying increased personal access to the riverfront park land that the reconfiguration of Plymouth Avenue will provide. In addition, I'm excited about the plans for increased retail, recreational and entertainment use of the area.

The origins and support for the project are community driven and very well documented. Every step in the process over the last twenty-plus years has been taken with the energy and input of my neighbors and representatives. It is my sincere hope that all this effort will finally bear fruit. The overwhelming support for the project exists as testament to the need for success of this project. I now wish to formally add my voice.

Sincerely,

Dear Commissioner Kue,

This letter could not express my feelings better, but I wanted to add a few things.

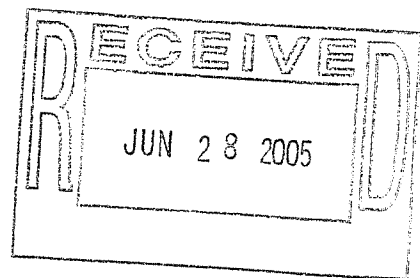

I own my home at 247 Brooks and have always experienced a lot of traffic headed East on Brooks toward Genesee St. I've learned to be patient backing out of my driveway. I know this project will increase the traffic a bit, from airport to the hotel, but I can live with that looking forward to a wonderful improvement to our neighborhood. I've lived here 32 years & I remember elderly Mr. Carr at Carr Drugs (corner of Genesee & Brooks) with the Brooks Landing plans, it would turn this area around to be a very pleasing area to come to. We like our U of R neighbors over the River & this will definitely promote a lucrative & friendly relationship with them.

I whole-heartedly support this project & look forward to the completion of it so we can all enjoy it!

Thank you.

Sincerely,

Barbara A. Burgess

Commissioner Fashun Ku
Department of Economic Development
City Hall Room 005-A
30 Church Street
Rochester NY 14614

Dear Commissioner Ku,

As proud residents of the 19th Ward for over 30 years we would like to state our complete support of the Brooks Landing Revitalization Project.

We have long looked forward to the realization of the Project, and have been dismayed at the many times and ways it has been held up in the past. We feel that the 19th Ward should offer the best in diverse city living, and we see the Brooks Landing Project as the key element in the restoration of the vitality, economic health and overall desirability of one of Rochester's oldest neighborhoods. [24, 5]

We feel that the reconfiguring of traffic on Plymouth Avenue will have a positive effect on the neighborhood and we are looking forward to the increased access that our family will have to the riverfront parkland. In addition, we are pleased about the plans for increased retail, recreational and entertainment use of the area. In particular, we feel the participation of the University of Rochester in the project, and their presence on our side of the river, will be beneficial to both the 19th Ward and the university community. We will no doubt be regulars at the Urban Brew Coffee House. [13, 23]

We are aware that the origins and support for the project are community driven and very well documented. Every step in the process over the last twenty-plus years has been taken with the energy and input of the neighborhood and our representatives. We are so close to successfully completing the project that we must all muster our energy and focus to carry it to completion. The 19th Ward's overwhelming support for the project exists as testament to the need for success of this project. [76]

We formally add our voices of support for the Brooks Landing Revitalization Project.

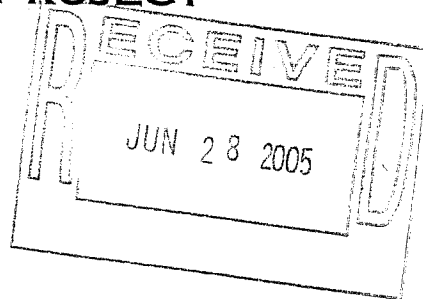

Sincerely,

Mitzie Collins

Rochester, NY 14614-1290

RE: Brooks Land Revitalization Project

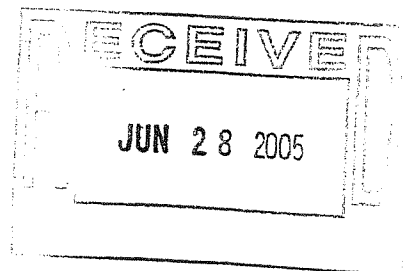

Dear Mr. Ku:

I whole-heartedly endorse the proposal to develop a hotel and restaurant along the Brooks/Genesee Corridor. The area needs to be developed from vacant, run down buildings/houses into a prosperous, safe, attractive, village-like center where people can live, shop, and recreate. This project has taken a long time to become reality. I have been a resident of the 19th Ward since 1980 and, specifically, a resident at 53 Arvine Heights since 1991 and am very excited about the development of the Brooks/Genesee area. People would still have access to the park, even with the hotel and restaurant.

Finally, this project can be completed after so many years of waiting.

Sincerely,

Sheila Bazil

IN SUPPORT OF THE BROOKS LANDING REVITALIZATION PROJECT

June 23, 2005

Dear Commissioner Ku,

Please note my complete support of the Brooks Landing Revitalization Project.

As a stakeholder in the fate of the community, I have long looked forward to the realization of the Project - the key element in the restoration of the vitality, economic health and overall desirability of one of Rochester's oldest neighborhoods. I believe the Project will provide a welcome to the West Side that all of Rochester will want to be a part of.

Among many changes, street improvements to resolve traffic flow issues that are underway have not had a major impact on my daily travels. In fact, I look forward to enjoying increased personal access to the riverfront park land that the reconfiguration of Plymouth Avenue will provide. In addition, I'm excited about the plans for increased retail, recreational and entertainment use of the area.

The origins and support for the project are community driven and very well documented. Every step in the process over the last twenty-plus years has been taken with the energy and input of my neighbors and representatives. It is my sincere hope that all this effort will finally bear fruit. The overwhelming support for the project exists as testament to the need for success of this project. I now wish to formally add my voice.

Sincerely,

Signature

I work at the UR and park off Brinks Ave., using the footbridge and area stores regularly. This is a good development.
